

Sujeet

4 years of experience

C.N.: 8406079468

SUMMARY

- 4 years of experience as a Full Stack Developer with expertise working on various platforms like node, express Js, PHP, Laravel, and Symfony
- Experience with the design and development of web pages using XML, MVC, JSON, jQuery, CSS, and Angular 8
- Experience with Laravel, Zend MVC, CodeIgniter, Smarty, and WordPress frameworks
- Experience in using WAMP (Windows, Apache, MySQL, and PHP) for Development using Laravel/ Symfony
- Expertise in building the RESTful APIs and Microservices using Node.js technology
- Extensive knowledge in developing web pages quickly and effectively using HTML 5, CSS3, JavaScript, and jQuery and also experience in making web pages Cross-browser compatible
- Experience in developing PHP-based server APIs using Zend2, Cake, Symfony framework, and MVC architecture
- Hands-on experience in configuring SQL Server Reporting Services for Dashboard reports
- Experience working with data structures
- Experience in developing Dashboard reports using Reporting Services, Report Models using Report Builder
- Experience in creating ETL load process and strategy as per technical requirements
- Proficiency in MySQL, JavaScript, REST, Shell Scripting, and CI/CD,
- Experience with Angular, Node.js, and NPM
- Experience in creating reports using SQL query
- Experience in uploading the data in AWS S3 and deploying on the AWS server
- Experience working on Windows and Linux and also aware of the OOPs Concepts
- Experience with Loopback and Express.js frameworks
- Experience in creating a Scheduled Job with Hadoop and Pyspark

EDUCATION

- Master of Computer Application

CORE SKILLS

Frameworks: Core PHP, Laravel, Symfony, Angular, Zend, CodeIgniter jQuery, Node, Magento2

Programming Languages: Node.js, jQuery, JavaScript, PHP, Python

Operating Systems: Windows 2000, XP, Linux

ETL Tools: SQL Server, AWS

Database: MySQL, PostgreSQL, SQLite, MongoDB

Big Data: Hadoop, Hive, Pyspark

- Hands-on experience with version control tools like Git and SVN

PROJECTS

Project -1

Project Overview - This project provides a solution for medical test kit purchase and observation by yourself

Technologies Used - PHP, MySQL

Key Responsibilities -

- Understand the requirements of a client and develop the module
- Developed a feature for observing self-test by video conferencing

Project -2

Project Overview - It is an advanced software for ticketing or collecting registrations to events, both virtual and in-person, packed full of the features you need, but simple enough for anyone to use

Technologies Used - Node, Angular 8, Express framework, MySQL, DB design, API creation, Module

Key Responsibilities -

- Research and investigation of MySQL
- Building the RESTful APIs using Express
- Used stripe for Payment Gateway
- Used Redis cache for caching backend data

- Preparing project scope and functional description as well as design
- Involved in software design part HTML and CSS, Angular 8

- Worked on the database for storing data in MySQL
-

Project- 3

Project Overview - This project provides a database for business valuation, merger, and acquisition research

Technologies Used - PHP, Laravel, NodeJS, ReactJS, PSQL with (Sequelize ORM), PostgreSQL

Key Responsibilities -

- Responsible for creating APIs for new features and bug fixes in frontend
- Build the Restful APIs NodeJS Technology
- To consume backend API develop front-end applications in ReactJS

Project -4

Project Overview - It was a live project that generated reports of Audits and assigned tasks to audits

Technologies Used - PHP, CodeIgniter, HTML, CSS, JavaScript, Ajax, jQuery, MySQL

Role: Module development

Key Responsibilities-

- Researched and designed the MySQL Database
- Developed some modules and fixed some bugs of the report download
- Involved in the software design part of HTML and CSS
- Worked on a database for storing data in MySQL

Project -5

Project Overview - This project is an extension of magento2, which provides the functionality of creating stores, Locations by Search, etc

Technologies Used - PHP, Magento 2, MySQL, Firebase, Linux, DataTable

Key Responsibilities-

- Designed in MySQL database for storing data and other operations
- Prepared project scope and functional description
- Integrated Google map and Google placed for nearby search
- module development in frontend with angular.
